Privacy in PMBOK 8

A proposed performance domain for the Who (WH) concentration

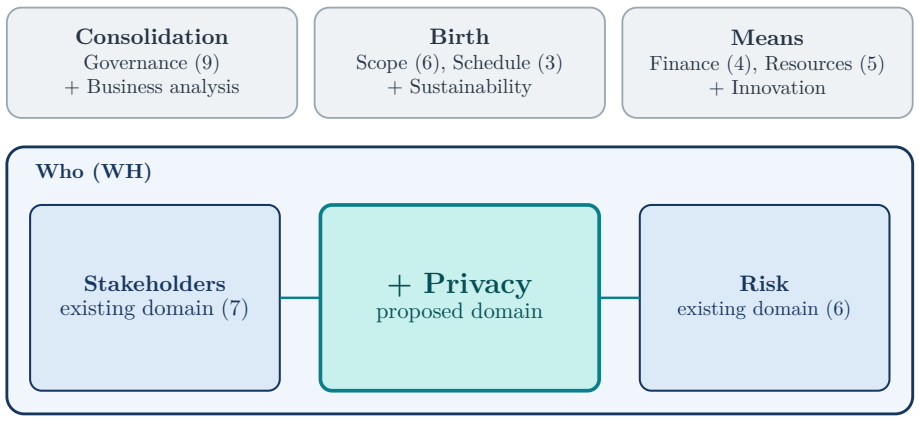

Authors: Filipe Alves de Sousa, Emanuel Brandão de Galvão Correia, Ruben Isaac Dias da Silva, and Carlos Eduardo da Silva Papa
Course: IT Project Management (GPTI) – PPCA/CIC/UnB
Professors: Dr. João Mello da Silva and Dr. Edison Ishikawa
Code: 3p2 / 3R31

Problem and proposal

PMBOK 8 [14] mentions data protection and privacy, but its seven domains and 40 processes do not organize personal-data processing as a distinct management object. We propose **Privacy** in the **Who** concentration, alongside Stakeholders and Risk.

Guiding question: how might project data practices affect people, and what evidence supports the project's choices?

Figure 1 — Where Privacy fits

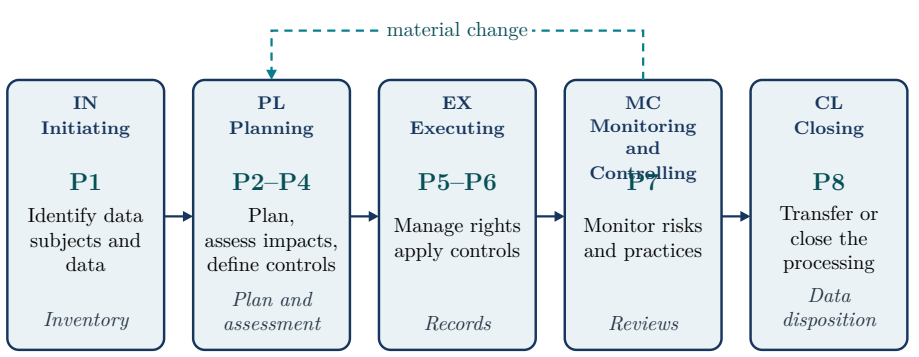

The four concentrations are the organization adopted in this work. **Privacy** is the group's contribution to the **Who** concentration.

Alignment with the 6 principles

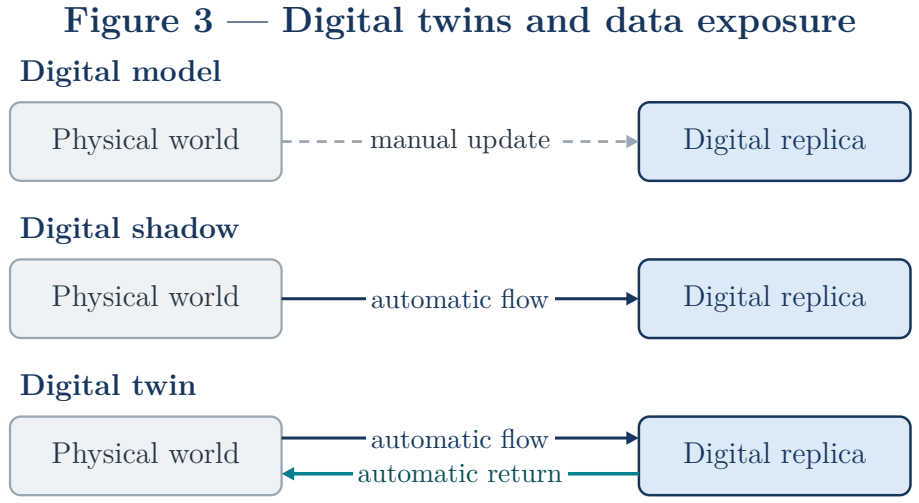

1AHV End-to-end view of data flows
2FOV Benefits weighed against potential harms
3QPD Privacy as verifiable quality
4BAL Accountable decisions and owners
5SPA Lasting effects on people
6BEC Channels for challenge and learning

Figure 2 — Privacy across the project

P1–P8 are **group-proposed processes** across the five focus areas. The return arrow indicates reassessment; data processing may continue after project closure.

Figure 3 — Digital twins and data exposure

The classification follows Kritzinger et al. [12]. Automatic, frequent flows call for attention to data subjects, purposes, sharing, risks, and data disposition [17].

Eight proposed processes: decision and evidence

P1 Identify subjects and data → initial inventory
P2 Define purposes and roles → privacy plan
P3 Assess impacts on people → assessment; DPIA if warranted
P4 Choose proportionate responses → control plan
P5 Inform and route requests → response records
P6 Apply controls and handle incidents → implementation evidence
P7 Review effectiveness and new purposes → plan update
P8 Decide retention, transfer, or deletion → disposition record
