PMBOK 8 on one page

Principles, processes and tailored practice

Principles guide decisions; domains and Focus Areas organize the work; tailoring adjusts their application [5].

Authors: Filipe Alves de Sousa and members of the Colégio Reciclagem 1 group
Course: IT Project Management (GPTI) – PPCA/CIC/UnB
Code: 3p2 / 3R31

Figure P1 — Principles and tailoring

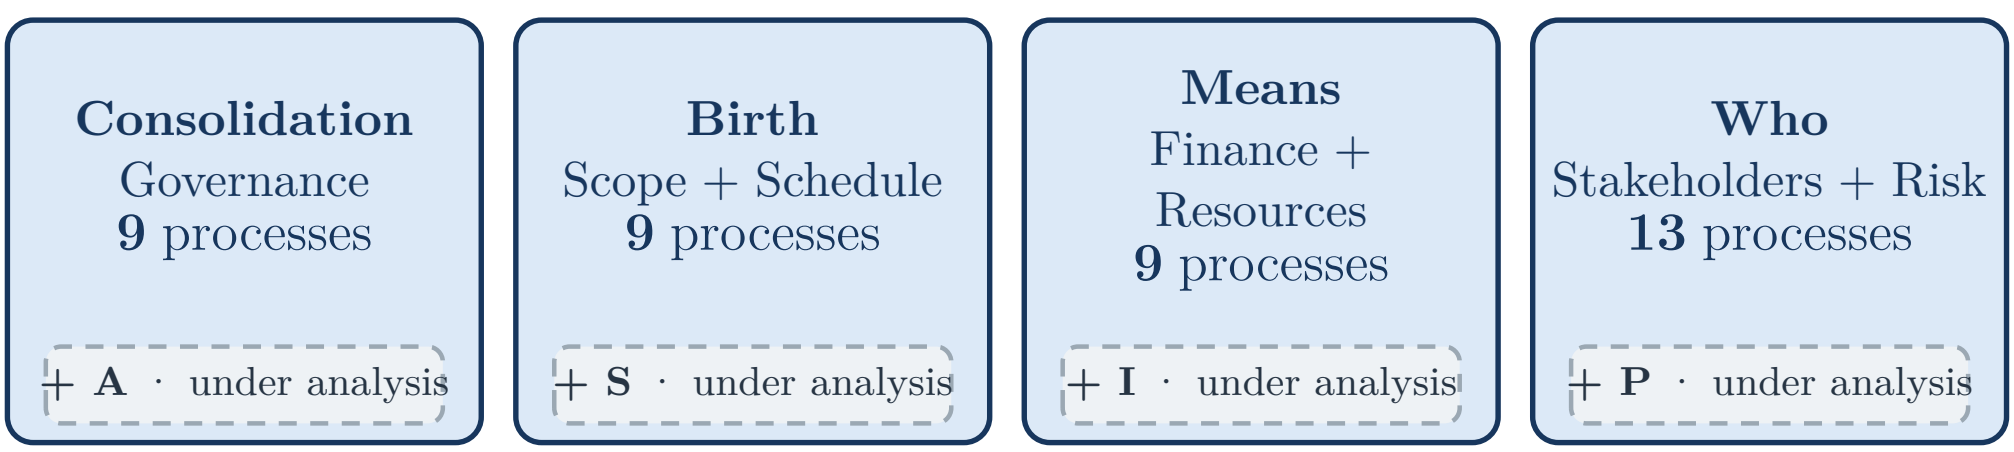

Five operations on processes: add · modify · remove · blend · align. **Three objects of tailoring:** life cycle and development approach · processes · engagement [5].

Figure P2 — Map of 40 processes

Domain	IN	PL	EX	MC	CL	Total
Governance	1	2	3	2	1	9
Scope	0	4	0	2	0	6
Schedule	0	2	0	1	0	3
Finance	0	3	0	1	0	4
Stakeholders	1	2	2	2	0	7
Resources	0	2	2	1	0	5
Risk	0	4	1	1	0	6
Total	**2**	**19**	**8**	**10**	**1**	**40**

Legend: IN Initiating · PL Planning · EX Executing · MC Monitoring and Controlling · CL Closing. Process count ≠ duration or importance of an area. *Identify Stakeholders* is in Initiating (Guide Figure 2-32).

Figure P3 — Four domain concentrations

Reading notice: the four concentrations and the A, S, I, and P labels are the **analytical grouping of this work**; the seven domains and their 40 processes are from PMBOK 8 [5].

How to use this summary

Select an initial approach, tailor it to the organization and project, and improve it continuously [5]. The map locates the 40 processes without prescribing a single sequence; process counts do not indicate duration or importance. PMBOK 8 does not describe digital twins. Studies of hybrid approaches [4, 6] help place tailoring decisions in context.
